

SANDEEP DAVÉ, Biography

Sandeep Davé is the Chief Business Officer for AM Technical Solutions. Mr. Davé has over 29 years of experience primarily in Semiconductors and Photonics, and most recently in Medical Devices. He has held numerous leadership positions for Hughes Optical Systems, MICRUS, GLOBALFOUNDRIES, Philips Semiconductors and Philips Healthcare.

In semiconductors, his leadership positions include serving as the General Manager at NXP Semiconductors of a fabrication facility focused on analog mixed signal semiconductor technologies, and as the VP of Operations at GLOBALFOUNDRIES covering all aspects of manufacturing, process integration, test and yield engineering.

Earlier in his career, he spent 10 years at Perkin-Elmer/Hughes Optical Systems working on the manufacturing and research and development of optical coatings and optics fabrication. Prior to his current role, Mr. Davé served as VP Operations at Philips Healthcare leading the operations team through remediation.

AM Technical Solutions specializes in construction management, project management, and facility solutions for the high tech markets. Our market focus is targeted in semiconductor, life sciences, pharmaceutical, data centers, solar, aerospace, research, university, and other high technology facilities. We have successfully managed over \$20 billion of global capital projects, cleanroom construction builds and facility expansions for over 170 different customers in 15 different countries.
